

Capability Statement

About Us

River Engineering (River) is a civil infrastructure consultant focused on providing client-centric solutions. Established in 2010, we offer specialist project management and civil infrastructure, water and wastewater engineering services to state government departments and agencies, local governments and the private sector.

Our Mission

River's mission is to successfully deliver project services by:

- » Listening to clients to understand their requirements
- » Working collaboratively to exceed expectations
- » Presenting innovative and value for money solutions
- » Delivering high quality projects, on time and within budget
- » Identifying and mitigating project risks.

Our Credentials

River is a prequalified developers engineering consultant for the Water Corporation in Western Australia. We are also a preferred supplier for the WA Local Government Association (WALGA).

We are a shareholder of Landing Contracting, an 80% Aboriginal-owned company in the Pilbara region. River supports Landing Contracting to deliver design and construct contracts in the resource, state and local government, and private sectors.

What we do

River Engineering has experienced project management, design and superintendent staff who manage projects from the development and design phase through to tender and contract administration phases.
